- Hardware Installation & Maintenance
- Software Configuration & Deployment
- Server Installation & Management
- Networking (TCP/IP, UDP, LAN/WAN)
- Microsoft 365 Administration
- Operating Systems Management
- Customer Support & Issue Resolution

PROFESSIONAL EXPERIENCE

Support Engineer | Riayatech | 2025 – Present

Provide technical support to clients by diagnosing and resolving hardware, software, networking, and server-related issues. Manage support requests, troubleshoot technical problems, and ensure timely solutions to maintain smooth business operations.

Handle server installation, configuration, maintenance, and monitoring activities. Assist users with software issues, provide technical guidance, perform system checks, configure operating systems, and support IT infrastructure requirements. Work closely with clients and internal teams to improve service quality and reduce downtime.

IT Support Executive | N7 Group | 2024 – 2025

Delivered comprehensive IT support to employees and end-users by resolving hardware, software, network, and operating system issues. Managed daily IT operations and ensured workstations, servers, and business applications remained available and secure.

Installed and maintained computer systems, printers, networking equipment, and IT peripherals. Provided Microsoft 365 support, software configuration assistance, and technical training while maintaining professional communication and customer satisfaction.

IT Manager | MGC Developments | 2021 – 2024

Managed the organization's IT infrastructure, technology operations, and support activities. Developed IT solutions aligned with business requirements while ensuring system reliability, security, and performance.

Oversaw network administration, server management, data security, system updates, hardware deployment, and IT planning. Led technical improvements, guided IT team activities, minimized system downtime, and implemented best practices for efficient IT operations.
