

Personal Portfolio Website

Ahsan Ilyas

Product	Personal portfolio website
Owner	Ahsan Ilyas
Prepared for	Ahsan Ilyas (site owner) and whoever builds the site
Version	1.0 (Draft)
Date	September 24, 2026
Status	Ready for review

1. Overview

1.1 Summary

Ahsan Ilyas is an IT Support Executive and Systems & Networking professional based in Islamabad, Pakistan, with 4+ years of hands-on experience across IT operations, technical support, server management, networking, and Microsoft 365 administration. He has progressed from **IT Manager** (MGC Developments, 2021-2024) to **IT Support Executive** (N7 Group, 2024-2025) to **Support Engineer** (Riayatech, 2025-present).

This PRD defines a single-owner portfolio website that presents his experience, skills, and services professionally, gives recruiters and clients a fast way to contact him, and lets anyone download his CV.

1.2 Problem Statement

A PDF resume is easy to overlook and can't be found through search. IT hiring managers, recruiters, and potential freelance or managed-support clients need to quickly confirm three things: *what he can do, what he's done, and how to reach him*. A focused portfolio site answers all three in under a minute and gives him an online identity he controls.

1.3 Product Vision

A fast, clean, professional website that makes Ahsan the obvious pick for IT support, systems, and networking roles, and makes contacting him effortless.

2. Goals, Non-Goals & Success Metrics

2.1 Goals

1. Present a professional online identity that builds trust within the first 10 seconds.
2. Showcase career progression and technical capability clearly.
3. Drive contact: job offers, interview invitations, and freelance/support inquiries.
4. Make his CV one click away.
5. Rank for his own name and for "IT support Islamabad"-type searches over time.
6. Be easy for him to update himself without a developer.

2.2 Non-Goals (v1)

- No blog or CMS-driven publishing platform (can come in v2).
- No user accounts, login, or e-commerce.
- No client ticketing or helpdesk system.
- No multi-language site (English only in v1; Urdu is a possible v2).

2.3 Success Metrics

Metric	Target (first 3 months)
Lighthouse score (Performance / Accessibility / SEO / Best Practices)	90+ each
Page load (LCP) on mobile 4G	< 2.5 s
CV downloads	20+
Contact form submissions / emails / WhatsApp clicks	10+
Search result for "Ahsan Ilyas IT"	Site appears on page 1
Average time on site	> 60 s

3. Target Audience

Persona	Who they are	What they need
Recruiter / HR	Screening many candidates quickly	Role, years of experience, location, CV download, contact
Hiring Manager (IT / Ops)	Assessing technical fit	Skills, real responsibilities, progression, certifications
Small business owner	Needs outsourced or part-time IT support	Services offered, trust signals, easy way to reach out
Peers / referrals	Colleagues or friends recommending him	A clean link to share

Primary audience: Recruiters and hiring managers. **Secondary:** small-business clients.

4. Positioning & Content Strategy

- **Headline:** Ahsan Ilyas: IT Support & Systems/Networking Professional
- **Tagline options:** "Keeping your systems running and your teams productive." / "Reliable IT support, servers, and networks, from helpdesk to infrastructure."
- **Tone:** Professional, confident, plain-spoken. Avoid buzzword stuffing.
- **Key differentiator:** He has both *hands-on support* experience and *management-level* experience (ran IT infrastructure and guided an IT team), which is uncommon for someone applying to support/engineer roles.
- **Location:** Islamabad, Pakistan (open to on-site, hybrid, or remote, to be confirmed by Ahsan).

5. Information Architecture

5.1 Site Structure (single-page with anchor navigation)

```
Home (Hero)
|-- About
|-- Skills
|-- Services
|-- Experience (timeline)
|-- Education
|-- Projects / Case Studies (optional, see section 11)
|-- Certifications (optional, see section 11)
|-- Contact
Footer
```

A single-page layout is recommended for v1. It's fastest to load, simplest to maintain, and easiest for recruiters to scan. Sections can be split into separate pages later.

5.2 Navigation

- Sticky top navigation with anchor links: **About, Skills, Experience, Services, Contact**
- Prominent "**Download CV**" button in the nav (desktop) and in the hero (mobile)
- Mobile: hamburger menu, closes on link tap

6. Functional Requirements by Section

6.1 Hero

Purpose: Immediate clarity about who he is and what action to take.

- Name: **Ahsan Ilyas**
- Title: **IT Support Executive | Systems & Networking Professional**
- One-line value statement (see section 4)
- Location: Islamabad, Pakistan
- Profile photo (professional headshot, see section 10)
- Two CTAs: **Download CV** (primary) and **Contact Me** (secondary)
- Quick stats strip, e.g. **4+ Years Experience / 3 Organizations / Servers, Networking, Microsoft 365**
- **Requirements:** above-the-fold on desktop and mobile; the CV button downloads the PDF directly and tracks the click

6.2 About

Content is drawn from the CV summary:

- 2-3 short paragraphs: experienced IT Support Executive with 4+ years across IT operations, technical support, system administration, networking, and infrastructure management. Skilled at diagnosing complex hardware and software issues, managing servers, configuring systems, and delivering reliable solutions. Focus on user support, stable IT environments, and operational efficiency.
- A short "What I'm looking for" line based on his career objective: a challenging IT position where he can apply his support, networking, and operations experience.
- Quick facts panel: Location, Languages (English and Urdu, both fluent), Interests (Football, Cricket)

6.3 Skills

Group skills into scannable clusters rather than one long list.

Category	Skills (from CV)
Support & Troubleshooting	IT troubleshooting, technical support, remote troubleshooting, customer support & issue resolution

Category	Skills (from CV)
Systems & Servers	Server installation & management, server support & monitoring, operating systems management, system administration
Networking	TCP/IP, UDP, LAN/WAN, network configuration & maintenance
Microsoft 365 & Software	Microsoft 365 administration, software configuration & deployment, software installation & updates
Hardware & Assets	Hardware installation & maintenance, IT asset management
Access & Accounts	User account & access support

- Displayed as tag chips or grouped cards
- Optional proficiency indicator (Expert / Advanced / Working knowledge) only if Ahsan is comfortable rating himself; avoid percentage bars, which look arbitrary

6.4 Services (secondary audience)

Show what he can help with, framed for small businesses. Only include what Ahsan actually wants to offer.

- Workstation, printer, and peripheral setup and support
- Server installation, configuration, and monitoring
- Network setup, troubleshooting, and maintenance
- Microsoft 365 setup and user administration
- Remote technical support
- IT asset tracking and documentation

Requirements: card layout with icon, title, and 1-2 line description. Each card links to the Contact section.

6.5 Experience (Timeline)

Role	Company	Period
Support Engineer	Riayatech	2025 - Present
IT Support Executive	N7 Group	2024 - 2025
IT Manager	MGC Developments	2021 - 2024

Per role, display: title, company, dates, and 3-5 concise bullets (converted from the CV's paragraphs), for example:

- **Riayatech:** Diagnose and resolve hardware, software, networking, and server issues for clients; handle server installation, configuration, maintenance, and monitoring; work with clients and internal teams to improve service quality and reduce downtime.
- **N7 Group:** Delivered IT support across hardware, software, network, and OS issues; kept workstations, servers, and business applications available and secure; supported Microsoft 365 and provided technical training.
- **MGC Developments:** Managed IT infrastructure and operations; oversaw network administration, server management, data security, system updates, hardware deployment, and IT planning; guided IT team activities and minimized downtime.
- Vertical timeline on desktop, stacked cards on mobile; most recent role first, expandable details optional
- Strongly recommended: add measurable results where true (see section 11)

6.6 Education

Qualification	Institution	Period
Bachelor's in Software Engineering	CUST	2016 - 2020
FSc Pre-Engineering	PCIT	2013 - 2015

6.7 Projects / Case Studies (optional but high-value)

The CV lists no projects, but a portfolio without any proof of work is weaker. If Ahsan can supply them, each entry follows a **Problem, Action, Result** format, e.g. "Office network rebuild," "Server migration," "Reduced ticket resolution time," "Microsoft 365 rollout." Screenshots should be sanitized (no IPs, passwords, or client names without permission). If none are available at launch, hide this section rather than leave it empty.

6.8 Certifications (optional)

None appear on the CV. If he holds or is pursuing any (e.g., CompTIA, Microsoft, Cisco, ITIL), show them as badges with issuer, year, and verification link. Hide the section if empty.

6.9 Contact

- Email: ahsanilyas472@gmail.com
- Phone / WhatsApp: +92 313 5028334
- Location: Islamabad, Pakistan
- LinkedIn link (to be provided)

Contact form fields: Name, Email, Subject (dropdown: Job Opportunity / IT Support Inquiry / Other), Message.

- Client- and server-side validation; clear success and error states
- Spam protection (honeypot field or invisible CAPTCHA)
- Submissions delivered to his email
- One-tap actions: `mailto:`, `tel:`, and WhatsApp click-to-chat link
- **Privacy note:** a phone number and email published on a public page can be scraped for spam, so offer the form as the primary channel and consider obfuscating the email address in the HTML

6.10 Footer

Name and copyright, quick links, social links (LinkedIn, GitHub if any), back-to-top button.

7. Feature Prioritization

Priority	Feature
P0 (Launch)	Hero, About, Skills, Experience, Education, Contact section with form + email/phone links, CV download, responsive design, basic SEO, HTTPS, analytics
P1 (Soon after)	Services section, dark/light mode, Projects/case studies, Certifications, LinkedIn/GitHub links, Open Graph sharing image, scroll animations
P2 (Future)	Blog / IT tips section, testimonials & recommendations, Urdu version, downloadable IT checklists, booking calendar (Calendly) for consultations

8. Design Requirements

8.1 Look & Feel

- Clean, modern, professional. Should read as "trustworthy IT professional," not "flashy designer."
- Generous whitespace, strong typographic hierarchy, minimal decoration.
- Subtle tech cues (e.g., a thin grid, terminal-style accent, or network-node motif) used sparingly.

8.2 Suggested Visual Direction

- **Colors:** Deep navy or charcoal base, one accent (teal/cyan or electric blue), off-white text on dark or dark text on light. Ensure WCAG AA contrast.

- **Typography:** One sans-serif for body (e.g., Inter) and optionally a monospace accent for labels/tags (e.g., JetBrains Mono).
- **Imagery:** A professional headshot; simple icons for services and skills. No stock-photo clutter.
- **Theme:** Light and dark mode with a toggle; respects the visitor's system preference.

8.3 Responsiveness

- Mobile-first. Breakpoints for phone, tablet, laptop, and large desktop.
- Tap targets at least 44x44 px; no horizontal scrolling.

8.4 Accessibility (WCAG 2.1 AA)

- Semantic HTML landmarks and heading order
- Keyboard navigable with visible focus states
- Alt text on all images; labels on all form inputs
- Respect prefers-reduced-motion

9. Technical Requirements

9.1 Recommended Approach

Because the site is a static, content-only portfolio, keep it simple, fast, and cheap.

Area	Recommendation
Stack (Option A, simplest)	Plain HTML + CSS + a little JavaScript, or Tailwind CSS
Stack (Option B, easy updates)	Astro or Next.js (static export) with content kept in a JSON/Markdown file
Hosting	Vercel, Netlify, Cloudflare Pages, or GitHub Pages (all have free tiers and free HTTPS)
Contact form	Formspree, Netlify Forms, Web3Forms, or EmailJS (no backend required)
Analytics	Privacy-friendly option (Plausible, Umami) or Google Analytics 4
Domain	A custom domain such as ahsanilyas.com or ahsanilyas.dev (about \$10-15/year)
Email on domain (optional)	hello@ahsanilyas.com for a more professional address

9.2 Non-Functional Requirements

- **Performance:** total page weight under 1.5 MB; optimized WebP/AVIF images with lazy loading; minimal JS; system-font fallback
- **Security:** HTTPS only, security headers, no secrets in client code, form spam protection
- **Browser support:** Latest two versions of Chrome, Edge, Safari, Firefox, and mobile Chrome/Safari
- **Maintainability:** Content (text, dates, skills) separated from layout so Ahsan can update it in one file
- **Backups:** Source in a Git repository (GitHub)

9.3 SEO Requirements

- Unique title and meta description, e.g. "Ahsan Ilyas | IT Support & Systems/Networking Professional in Islamabad"
- Open Graph and Twitter card tags with a preview image (for LinkedIn/WhatsApp sharing)
- Person structured data (JSON-LD) with name, job title, location, and links
- sitemap.xml, robots.txt, canonical URL
- Descriptive headings that include relevant keywords naturally (IT support, server administration, networking, Microsoft 365, Islamabad)

- Submit the site to Google Search Console and add the URL to his LinkedIn profile

9.4 Privacy & Legal

- Short privacy note near the form explaining what data is collected and why
- Cookie banner only if analytics that require consent are used
- Do not publish any confidential employer or client information

10. Content Inventory (source: CV)

Content	Status
Name, title, location	Available
Professional summary	Available (needs light rewrite for web)
Skills list	Available
3 work experiences	Available (needs bullets and results)
Education	Available
Languages, interests	Available
Career objective	Available
Email and phone	Available
Professional headshot	Needed
LinkedIn / GitHub URLs	Needed
Projects / case studies	Needed (recommended)
Certifications	Needed if any
Measurable achievements	Needed (recommended)
Testimonials / references	Optional
Domain name	Needed

11. Recommendations to Strengthen the Content

The CV is solid on scope but light on proof. Before launch, Ahsan should try to add:

1. **Numbers.** For example: users supported, number of servers or workstations managed, average ticket resolution time, downtime reduced, team size he led at MGC. Even approximate figures ("supported 80+ users") make a big difference.
2. **Tools and platforms by name.** The CV says "server" and "operating systems" generically. Naming what he actually uses (Windows Server, Active Directory, Linux, VMware/Hyper-V, Microsoft Intune, firewalls, ticketing tools like Jira/Freshdesk, etc.) helps both recruiters and search.
3. **Certifications or training.** If none, consider listing a planned one (e.g., CompTIA Network+, Microsoft 365 Fundamentals, CCNA) under "Currently learning."
4. **One or two case studies.** Two well-written stories carry more weight than a long skills list.
5. **A professional photo.** Well-lit, plain background, business-casual.
6. **Consistency.** Job titles and dates on the site, LinkedIn, and CV should match exactly.

12. User Flows

1. **Recruiter:** Lands on site, reads hero, scans experience, clicks **Download CV**, and optionally contacts via email/WhatsApp.
2. **Hiring manager:** Lands, reads About, checks Skills and Experience, views a project or certification, and uses the contact form.
3. **Small business owner:** Lands, reads Services, checks trust signals (experience, location), and sends an inquiry via the form.

13. Milestones & Timeline (Estimated)

Phase	Deliverable	Est. Duration
1. Content prep	Final copy, photo, links, achievements gathered	3-5 days
2. Design	Wireframes and visual design (light/dark) approved	3-5 days
3. Build	Responsive site with all P0 features	5-7 days
4. QA	Cross-browser, mobile, accessibility, and performance testing	2-3 days
5. Launch	Domain connected, HTTPS live, analytics and Search Console set up	1 day
6. Post-launch	Add P1 features, share on LinkedIn, gather feedback	Ongoing

Total to launch: roughly 2-3 weeks part-time (about 1 week for a simple static build if content is ready).

14. Acceptance Criteria (Launch Checklist)

- ☐ All P0 sections present and content matches the final CV
- ☐ CV PDF downloads correctly on desktop and mobile
- ☐ Contact form delivers to Ahsan's inbox and shows clear success/error messages
- ☐ Email, phone, and WhatsApp links work on mobile
- ☐ Site works on Chrome, Edge, Safari, Firefox, Android, and iOS
- ☐ Lighthouse 90+ across all four categories on mobile
- ☐ Passes an accessibility check (keyboard navigation, contrast, alt text)
- ☐ Meta tags, Open Graph preview, sitemap, and structured data verified
- ☐ HTTPS active on the custom domain
- ☐ Analytics recording visits and CV downloads
- ☐ No broken links; no placeholder or lorem-ipsum text
- ☐ Ahsan can update text without help from a developer

15. Risks & Mitigations

Risk	Impact	Mitigation
Missing photo, projects, or metrics delay launch	Delayed / weaker site	Launch with P0 and hide empty sections; add content in v1.1
Public phone and email attract spam	Annoyance	Form as primary channel, obfuscate email, use spam protection
Site looks generic	Lower impact on hiring	Focus on strong copy, real numbers, and a distinctive but restrained design
Content becomes outdated	Loses credibility	Keep content in one editable file; review every 6 months
Sharing confidential employer details	Professional/legal risk	Anonymize projects; no internal IPs, credentials, or client names without permission

16. Open Questions for Ahsan

1. Are you seeking full-time jobs, freelance/managed-support clients, or both? (This decides how prominent the Services section is.)
2. Are you open to remote work, relocation, or overseas roles? Should the site say so?
3. Do you have any certifications, courses, or training to list?
4. Can you share 2-3 projects or achievements with numbers?
5. Which domain name do you prefer?
6. Do you want your phone number visible publicly, or form/email only?
7. Do you have a LinkedIn profile or GitHub account to link?
8. Any preferred colors, sites you like, or a preference for dark or light theme?
9. Do you want an Urdu version later?

17. Appendix: Suggested Copy Starters

Hero headline: Ahsan Ilyas | IT Support & Systems Professional

Hero sub-headline: 4+ years keeping servers, networks, and teams running smoothly, from helpdesk to infrastructure.

About (draft):

I'm an IT professional based in Islamabad with over four years of experience across technical support, system administration, networking, and infrastructure management. I've worked my way from managing an organization's full IT environment to delivering hands-on support for clients and end users. I enjoy solving hard hardware, software, and network problems and making technology dependable for the people who rely on it.

Contact CTA: Looking for reliable IT support or have an opportunity in mind? Let's talk.
